I am a final year student of Information Systems Study Program at Telkom University Jakarta with experience in data analysis, enterprise systems, and digital marketing. As an Ex-Data Analyst, I am responsible for data cleaning and analysis, visualization, and machine learning model creation. In addition, my experience as a laboratory assistant and digital marketer strengthens my technical skills in Python, SQL, Tableau, and understanding of SEO. With good analytical, problem-solving, communication, and teamwork skills, I am ready to contribute and continue to grow in the world of data and technology.

Education
